Agenda

- 01** What is ArgoCD?
 - a. What is GitOps?
 - b. ArgoCD Architecture

- 02** How to Integrate with ArgoCD?
 - a. Helm Chart
 - b. Integration Flow

- 03** Conclusion

What is ArgoCD?

ArgoCD is a declarative, **GitOps** continuous delivery tool for Kubernetes.

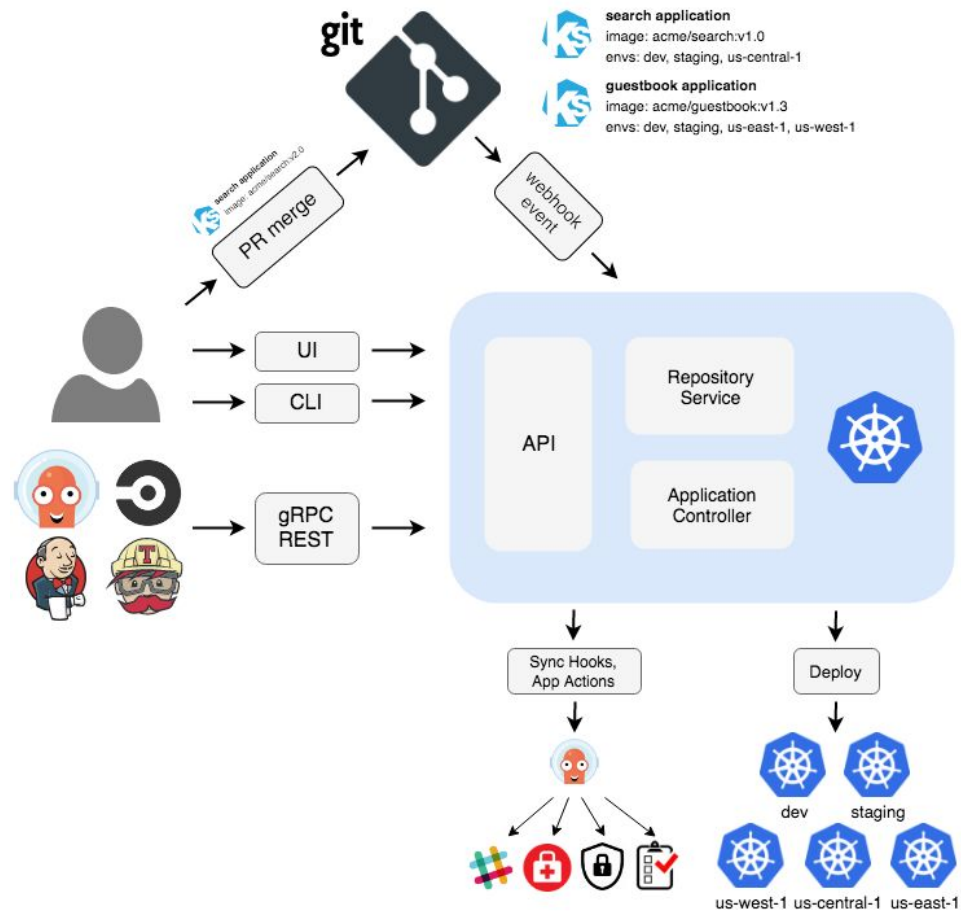

What is GitOps?

GitOps is an operational framework that applies DevOps best practices for infrastructure automation using Git as a single source of truth.

ArgoCD Architecture

How to Integrate with ArgoCD?

- kustomize applications
- helm charts
- jsonnet files
- Plain directory of YAML/json manifests

...

How to Integrate with ArgoCD?

- kustomize applications
- helm charts
- jsonnet files
- Plain directory of YAML/json manifests
-

ArgoCD Integration - Helm Chart

A package manager for Kubernetes that helps you define, install, and upgrade complex Kubernetes applications.

```
└─ hello-world
    ├── Chart.yaml
    ├── README.md
    ├── templates
    │   ├── NOTES.txt
    │   ├── _helpers.tpl
    │   ├── deployment.yaml
    │   ├── service.yaml
    │   └── serviceaccount.yaml
    └── values.yaml
```

deployment.yaml

```
1 apiVersion: apps/v1
2 kind: Deployment
3 metadata:
4   name: {{ include "hello-world.fullname" . }}
5   labels:
6     {{- include "hello-world.labels" . | nindent 4 }}
7 spec:
8   replicas: {{ .Values.replicaCount }}
9   selector:
10    matchLabels:
11      {{- include "hello-world.selectorLabels" . | nindent 6 }}
12   template:
13     metadata:
14       labels:
15         {{- include "hello-world.selectorLabels" . | nindent 8 }}
16     spec:
17       serviceAccountName: {{ include "hello-world.serviceAccountName" . }}
18       containers:
19         - name: {{ .Chart.Name }}
20           image: "{{ .Values.image.repository }}:{{ .Values.image.tag | default .Chart.AppVersion }}"
21           imagePullPolicy: {{ .Values.image.pullPolicy }}
22           ports:
23             - name: http
24               containerPort: 80
25               protocol: TCP
```

values.yaml

```
1 replicaCount: 1
2
3 image:
4   repository: nginx
5   pullPolicy: IfNotPresent
6   tag: ""
7
8   ...
9
```

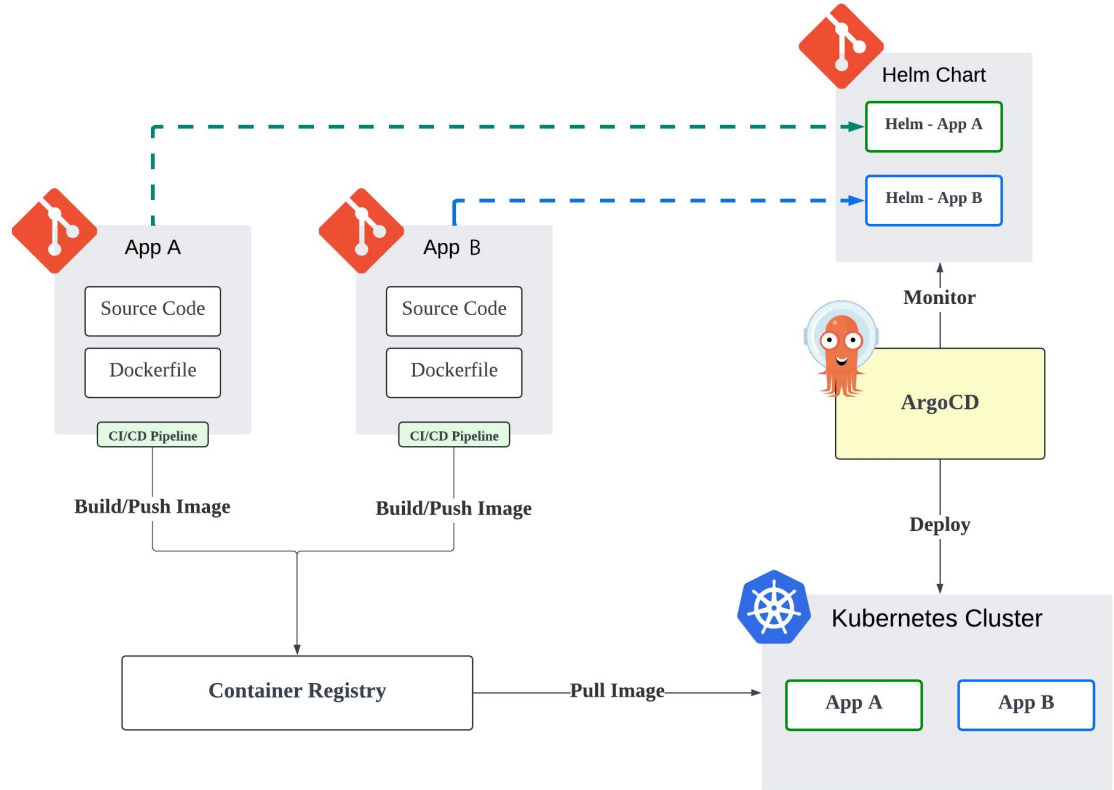

Benefits of using Helm Chart

Simplified deployment of complex applications

Easy management of multiple environments with value overrides

Integration Flow

Conclusion - ArgoCD

Automated deployment and synchronization

Enhanced and Simplified Kubernetes application management

Improved visibility into application deployments

Faster error detection and recovery

Thank You!
